

Basic Training Spinal Exam

- 1) Back pain is the most common cause of lost work time and disability in the U.S. T F
- 2) Spinal Degenerative arthritis is the result of lost joint function over time, not age. T F
- 3) When I have an episode of back pain, I should immediately apply ice. T F
- 4) All strain/sprain injuries heal with some amount of fibrotic and scar tissue. T F
- 5) Scar tissue will never go away and will restrict normal movement and function. T F
- 6) The disks in my spine are 80% water and mostly hydrate when the vertebrae move. T F
- 7) Pain tells me how healthy my spine is. T F
- 8) Failure to restore function means any pain relief is temporary. T F
- 9) A joint that cannot move cannot nourish itself and will lead to degenerative arthritis. T F
- 10) Back pain is caused by a lack of ibuprofen in my body. T F
- 11) Muscles spasm and get tight to protect from injury like a splint. T F
- 12) If I must sit, sitting on a balance ball is the best thing to choose. T F
- 13) Back pain is usually an episode of chronic degenerative arthritis. T F
- 14) A Chiropractor gets “stuck” joint moving better. T F
- 15) I should only take care of my spine when it hurts. T F
- 16) Morning lower back stiffness is normal when we get old. T F
- 17) Maintaining good motion is critical to the survival of disks and joints. T F
- 18) My spinal health is my Chiropractors responsibility, not mine. T F
- 19) When one area in my spine is stuck, others just move more to compensate. T F
- 20) Back pain is usually the result of deconditioning and poor biomechanics. T F
- 21) Chiropractors stretch and move tissues that I can’t. T F
- 22) I must stretch my muscles and ligaments 12 times to make them healthy. T F
- 23) A Chiropractor is necessary to help manage my spines health. T F
- 24) How often I get my spine stretched and adjusted will have a direct correlation
to how healthy my spine will be for the rest of my life. T F
- 25) Everyone should have their spine examined and managed by a Chiropractor. T F
- 26) I only brush my teeth when they hurt. T F
- 27) Chiropractic care helps to restore and maintain full range of motion. T F
- 28) Joints can have poor biomechanics without pain or other symptoms. T F
- 29) Regular Chiropractic care reduces the risks of injury and degenerative arthritis. T F
